Reside in: Moscow
Citizenship: Nigeria, work permit at: Nigeria
Ready to relocate, ready for business trips

Desired position and salary

Frontend-разработчик

90 000 ₽ in hand

Specializations:
   — Programmer, developer
Employment: full time, part time, project work, volunteering, work placement
Work schedule: full day, shift schedule, flexible schedule, remote working,
rotation based work
Desired travel time to work: any

Work experience — 7 years 10 months

May 2024 — June 2025
1 year 2 months

MagnetoIT Solutions

Аналитик данных

Designed and maintained dashboards for sales, marketing, and product KPIs using SQL and Power BI.
Built and optimized ETL data pipelines, improving query performance by 35%.
Automated weekly reports and campaign tracking for business teams, reducing manual workload by 50%.
Collaborated with developers to embed event tracking in React-based web apps using Segment and Mixpanel.
Worked closely with stakeholders to interpret data and guide roadmap decisions, leading to a 12% increase in user retention.
Tools: Python, SQL, Power BI, Excel, Google Analytics, Jupyter

Fullstack-разработчик

- Developed and maintained complex B2B web applications using React and Django.
- Built reusable frontend components and managed global state with Redux Toolkit.
- Designed and implemented RESTful APIs in Django and integrated with PostgreSQL.
- Handled user authentication, permissions, and role-based access using Django's built-in tools.
- Wrote and optimized ORM queries and background jobs using Celery.
- Deployed applications using Docker and GitHub Actions for CI/CD automation.
- Collaborated with designers and analysts across multiple time zones in an agile setup.
- Tools: React, Django, Python, PostgreSQL, Docker, GitHub Actions

YipitData

Senior Frontend Developer

- Led the development of scalable, modular UIs using React and later migrated key components to Next.js for improved performance and maintainability.
- Created and maintained custom design systems using shadcn/ui and Tailwind CSS, ensuring brand consistency across internal tools.
- Built interactive data visualizations and dashboards to display financial insights using D3.js and Chart.js.
- Worked closely with backend teams to integrate GraphQL and REST APIs, optimizing data flow and responsiveness.
- Mentored junior developers, conducted code reviews, and established frontend best practices in a fast-paced remote team.
- Participated in product design iterations using Figma, and contributed to a ~20% improvement in UI load times through lazy loading and code-splitting.
- Tools: Next.js, shadcn/ui, React, Tailwind, Redux, TypeScript, D3.js, GraphQL, Jest, Figma

**August 2016 —
July 2018**
2 years

Freelance & Startup projects

Junior Frontend Developer

- Built mobile-responsive web pages and prototypes using HTML5, CSS3, and JavaScript.
- Implemented dynamic features (forms, modals, sliders) using vanilla JS and early React.
- Worked directly with clients and project managers to translate requirements into interactive UIs.
- Gained practical experience with Git, browser debugging, and performance optimization.
- Contributed to launching 5+ MVPs and small business websites with cross-browser compatibility.
- Tools: JavaScript, HTML/CSS, jQuery, Git, Bootstrap

Education

Master

About me

Experienced and adaptable software engineer with 7 years of experience across frontend, full stack, and data analytics roles. Graduated with a B.Sc. in Computer Science at 19 and began working professionally during university. Proven track record of delivering scalable applications, driving data-informed decisions, and thriving in remote, cross-cultural teams. Currently based in Moscow, with international exposure including the U.S. and Russia.
